

# Brick Wall Safes

## Specification

The Stone Safes Brick Wall Safe is easy to install, simply remove one or more standard UK bricks and fill the opening with a Brick Wall Safe.

Constructed from 3mm steel the Brick Safe is cemented into place for added strength and security. The safe also has an extra lip to reduce the risk of the safe being removed.

Finished in a grey metallic rust proof coating and flock lined internally to prevent damage to contents, the Stone Safes Brick Wall Safe looks elegant in any domestic or commercial environment, but can easily be disguised with a painting or wall art.

Fitted with a 7 lever security safe lock as standard and supplied with 2 keys, the Brick Safe can be manufactured to client colour requirements - subject to quantity.

Export brick sizes are also available.

Brick Safes	External (mm)		
	H	W	D
2 Brick	116	213	105
3 Brick	225	213	105
4 Brick	323	213	105

To enable continued product development we reserve the right to alter the specification without notice. All measurements must be considered as approximate.
